Professional Summary

Computer science graduate with hands-on full-stack development experience using the MERN stack (MongoDB, Express.js, React, Node.js). Proven ability to lead backend design, develop responsive UIs, and apply Agile, CI/CD, and Test-Driven Development (TDD) principles. **Currently expanding expertise in DevOps tools** to enhance deployment automation and scalability. Open to relocation across Canada and eager to contribute to impactful software projects.

Technical Skills

Languages: Java, Python, TypeScript, JavaScript, HTML, CSS, C++, C#, C

Frameworks & Tools: Node.js, Express.js, React, Tailwind CSS, Bootstrap, Flutter

Databases: MongoDB, SQL

DevOps & Tools: Git, GitHub Actions, CI/CD, Docker, Jest, JWT, Thunder Client, UML

Other Skills: REST API Development, Agile Methodologies, TDD

Spoken Languages: French (native), English (fluent), Dutch (basic)

Projects

Ongoing: SPA Web Application

MongoDB, Express.js, React, Node.js, GitHub Actions, JWT – 2025

- Developing a responsive SPA with **JWT authentication** and exploring Docker for containerization.
- Implemented RESTful API endpoints with Node.js/Express.
- Integrated GitHub Actions for CI/CD and automated testing.

Café Sans Fil Management App

Node.js, Express.js, TypeScript, Flutter, MongoDB – Apr 2024

- Designed and implemented a high-performance REST API for a café management system.
- Led backend architecture using **TDD and Jest** for reliability.
- Built a responsive cross-platform UI with Flutter.
- Collaborated in a two-person Agile team, defining technical specs and user stories.

Forum Web App

Node.js, Express.js, TypeScript, React, MongoDB, JWT

- Secured backend with **JWT-based authentication** and role-based access control.

- Improved deployment process by **learning CI/CD best practices**.
-

Additional Information

- **Currently Learning:** DevOps tools (Docker, Kubernetes, AWS).
- **Availability:** Immediate
- **Willing to Relocate:** Yes
